

Periodic Table Groups and Their Elements

Memorizing the elements of each group in the periodic table can be difficult.

Here are some key groups and their elements:

1. **Alkali Metals (Group 1)**: Li, Na, K, Rb, Cs, Fr
2. **Alkaline Earth Metals (Group 2)**: Be, Mg, Ca, Sr, Ba, Ra
3. **Halogens (Group 17)**: F, Cl, Br, I, At, Ts
4. **Noble Gases (Group 18)**: He, Ne, Ar, Kr, Xe, Rn, Og

Mnemonics help students remember these easily. Try generating one for these groups!
